PRESS RELEASE

### CAPE TOWN CAPERS – CODEX MEETS AGAIN ON NUTRITION

November 13, 2008 by Scott Tips

Chairman Rolf Grossklaus

(& re. Codex/EU legislation around 'Health Claims' - "the Committee removed the requirement that Codex identify "the criteria for substantiation for the different types of claims." NHF and IFT both thought it important to retain this wording in order that persons and companies submitting dossiers for approval of health claims would know what basis was

being used by the regulators for accepting or rejecting health claims. Otherwise, arbitrary criteria would or could be used to thwart legitimate health claims. "The European Community disagreed, so the language was removed."

Speaking for the NHF on another point, Scott Tips argued to the Committee that, "*Any review of the available systematic data should take into account not just balanced diets but 'special diets required for a specific disease or condition.'*" The Chairman agreed that that was a useful addition and the language was included until the U.S. delegate, Barbara Schneeman, objected to the language as "not appropriate." The NHF argued back that this language was even more appropriate than the "balanced diet" wording as these were for people with special needs. "

**Obama, Dingell, Waxman, Kennedy, and Durbin Have Control of  
Decisions That Will Impact Your Health Freedom of Choice** November  
8, 2008

By Lee Bechtel  
NHF National Lobbyist

What the NHF does take a position on is health freedom and health-freedom policy; and what we have noticed over the many decades of our existence is the fact that the Democratic Party - all media hype aside - is the most anti-health freedom party in America. Bar none, they hate us and what we stand for. [http://www.thenhf.com/press\\_releases/pr\\_08\\_nov\\_2008.html](http://www.thenhf.com/press_releases/pr_08_nov_2008.html)

## **\*Americans Murdering Their Judges, and the US Crisis of Judicial Corruption** by Dr Leslie Sachs

The key statistic to understanding America, is that it has over 2.2 million prisoners (!) out of about 300 million people. This is 25 per cent of all the prisoners, anywhere, in the entire world. By comparison, the most populous nation, China, with about 1.3 billion people, only has a few hundred thousand prisoners, despite being denounced by the USA as a "repressive" country. 1 out of every 45 working-age males (that is, not counting children or the elderly) is BEHIND BARS in the United States. With working-age black males, the figures are about 1 out of 20. This is the stuff of revolution.
